32 PolySix programs for ambient and dance music

Thank you for downloading this soundset.

This soundset is made exclusively for the Korg Kronos synthesizer. It uses lots of the special features that the Korg Kronos PolySix synthesizer has to offer. This soundset contains 32 programs created with the PolySix.

Every program contains a drum track, 8 KARMA scenes and 8 Chords assigned to the Pads. If you want to have an idea how to use the sound just activate the drum track and KARMA and press one of the 8 pads. The most important part is that all sounds are different so you have examples of how to create specific type of sounds yourself.

There are lots of tricks hidden in these programs. Tricks like:

- WaveShaping
- Modulation through AMS sources
- 8 KARMA scenes with arpeggiator and chord gating patterns for Dance music
- 8 Chord progressions for Dance music for each program
- Effect demo's
- And much more!

So there's a lot more than meets the eye when you first look at the patches, so take your time to explore them if you want to learn programming the PolySix.

## **Performance tips and tricks**

Almost every program uses the following setup for the Modulation joystick, the Switches and the Ribbon. So try every sound to see how you can use these for performance purposes:

SW1: Transpose down

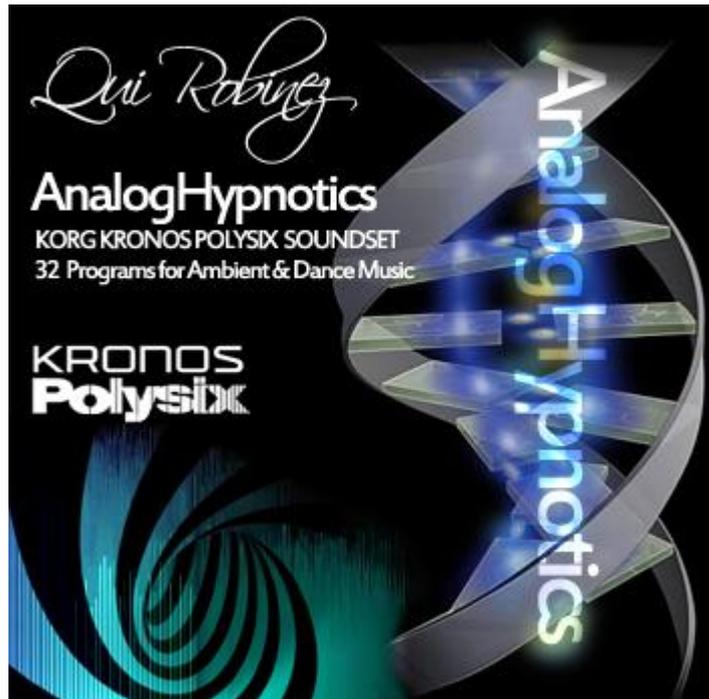

SW2: Lock Ribbon

Ribbon: Cutoff and Resonance

KARMA Scenes: every scene is different

## *Disclaimer:*

*All sounds can be used freely in any commercial and non-commercial musical production. It's not allowed to redistribute the content in this soundset without permission of Qui Robinez.*
