32 MS-20 programs for ambient and dance music

Thank you for downloading this soundset.

This soundset is made exclusively for the Korg Kronos synthesizer. It uses lots of the special features that the Korg Kronos MS-20 synthesizer has to offer. This soundset contains 32 programs created with the MS-20. Of course they contain a drum track and KARMA but the most important part is that they are very different so you have examples of how to create specific type of sounds with the patch panel.

There are lots of tricks hidden in these programs. Tricks like:

- AMS Mixer sources
- Morphing envelopes
- Constantly changing Pulse Width Modulation tricks
- Waveshaping
- Formant modulation
- Sample and Hold
- Feedback sounds (returning the output to the ms20 input)
- And much more!

So there's a lot more than meets the eye when you first look at the patches, so take your time to explore them if you want to learn programming the MS-20.

Performance tips and tricks

Almost every program uses the following setup for the Modulation joystick, the Switches and the Ribbon. So try every sound to see how you can use these for performance purposes:

SW1: Transpose down

SW2: Lock ribbon and JSY

JSY+: Modulation of the sound, most of the time Lfo speed connected to the cutoff

JSY-: Adding Resonance to the sound

Ribbon: Modifies the cutoff settings which you can lock with switch 2 (SW2)

Disclaimer:

All sounds can be used freely in any commercial and non-commercial musical production. It's not allowed to redistribute the content in this soundset without permission of Qui Robinez.
