Qui Robinez, Shiny & Rough

32 Programs for the MS-20 Engine in the Korg Kronos.
Thank you for downloading this soundset.

This soundset is made exclusively for the Korg Kronos synthesizer. It uses lots of the special features that the Korg Kronos MS-20 engine has to offer.

There are Filter Pads, Monophonic Hard Sync Bass and Lead Sounds and FX sounds in this set.

All the sounds can be played with and without effects. To get the dry Raw sound you only have to press the SW1 button. This disables the Effects assigned to the sound.

A few have an interesting patch panel setup to create feedback loops, for those patches use the Joystick.

Performance tips and tricks

Every program uses the following setup for the Switches

SW1: Different Effect Setups

SW2: Lock JS-Y & Ribbon

JS-Y: Cutoff / Resonance

Faq: How does the Switch Locking works?

To change the sound move the JS-Y till you hear a sound you like and then press the SW2 to lock that sound. Keep in mind that when the SW2 is activated that the Joystick won't work, since the values are locked as long as you the SW2 light is on.

Also try to change SW1, this can change a sound completely, most sounds have a different sound effect setup for switch 1.

Disclaimer:

Installation Guide

The Shiny & Rough sound library will be loaded in program Bank locations UGG000 till UGG-127

Be sure that you don't have any sounds in that bank that you want to save, because those locations will be overwritten. If you want to save your sounds then save your current bank with the *'SAVE ALL' or 'SAVE PCG'* function.

If you don't know how to do this see the explanations in the original Kronos manuals sections:

- · *Kronos Quick Start: Page 25*
- · *Kronos Parameter Guide: Page 829*

To install the Shiny & Rough Sound Library do the following steps:

- · Unzip the ShinyRoughMS20QR.zip file
- · You will have 2 files:
  - o ShinyRoughMS20QR.PGC (the sound data file)
  - o ShinyRoughMS20QR.PDF (the Manual)
- · Copy the ShinyRoughMS20QR.PCG file to an USB drive (thumb drive)
- · Connect the USB drive to the Kronos
- · Now press the Disk Button
- · Press the Load Tab on screen
- · At the bottom you will see a dropdownlist where you can select your USB drive
- · Select the ShinyRoughMS20QR.PCG file and press the *Load* button to load the sound library in bank UGG.

(If you want to load the programs in a different bank then choose a different bank).
